Address 1 Fikus St, Lod, Israel

A Graphic and UX/UI Designer with a creative mindset and strong technical foundation. At A.L Electronics, I worked on advanced medical systems and inspected electronic boards for satellites - an experience that strengthened my precision, problem-solving, and analytical thinking.

In design, I focus on crafting clear visual narratives, blending aesthetics with usability to create experiences that feel both intuitive and meaningful.

I'm passionate about thoughtful design that connects people, tells a story, and transforms ideas into visually engaging solutions. Constantly learning and evolving as a designer.

Education:

12 years of schooling with a full matriculation certificate, including an advanced track in Biology and Chemistry.

Design Education & Certification (2024-2025)
